Answer: C

Explanation:

The AWS lmentation mentions the following
You can use a combination of AWS CloudTrail, Amazon CloudWatch Logs, and Amazon Simple Notification Service (Amazon SNS) to create an alarm that notifies you of AWS KMS API requests that attempt to use a customer master key (CMK) that is pending deletion. If you receive a notification from such an alarm, you might want to cancel deletion of the CMK to give yourself more time to determine whether you want to delete it Options B and D are incorrect because Key policies nor lAM policies can be used to check if the keys are being used. Option C is incorrect since rotation will not help you check if the keys are being used. For more information on deleting keys, please refer to below URL:
<https://docs.aws.amazon.com/kms/latest/developereuide/deletine-keys-creatine-cloudwatch-alarm.html> The correct answer is: Use CloudTrail to see if any KMS API request has been issued against existing keys Submit your Feedback/Queries to our Experts
