NEW QUESTION: 2

- A. Option B
- B. Option D
- C. Option A
- D. Option C

Answer: B

Explanation:

Explanation

Each AWS region has multiple, isolated locations known as Availability Zones. To ensure that the AWS resources are distributed across the Availability Zones for a region, AWS independently maps the Availability Zones to identifiers for each account. In this case the Availability Zone US-East-1a where George's EC2 instances are running might not be the same location as the US-East-1a zone of Ray's EC2 instances. There is no way for the user to coordinate the Availability Zones between accounts.

NEW QUESTION: 3

Which two statements are true about Rowset subinterfaces?

- A. A FilteredRowSet object filter can be modified at any time.
- B. A JdbcRowSet object provides a JavaBean view of a result set.
- C. A webRowset returns JSON-formatted data.
- D. A cachedRowset provides a connected view of the database.

Answer: A,B

Explanation:

A:a JdbcRowSet object can be one of the Beans that a tool makes available for composing an application. Because a JdbcRowSet is a connected rowset, that is, it continually maintains its connection to a database using a JDBC technology-enabled driver, it also effectively makes the driver a JavaBeans component. C:The FilteredRowSet range criterion can be modified by applying a new Predicate object to the FilteredRowSet instance at any time. This is possible if no additional references to the FilteredRowSet object are detected. A new filter has an immediate effect on criterion enforcement within the FilteredRowSet object, and all subsequent views and updates will be subject to similar enforcement.

Reference: javax.sql Interface RowSet

NEW QUESTION: 4

How should an administrator limit the total number of backup or duplication jobs that write to or read from an AdvancedDisk pool concurrently?

- A. set the Maximum I/O streams value on the Disk Pool
- B. set the Maximum concurrent jobs value on the Disk Storage Server
- C. set the Maximum I/O streams value on the Disk Storage Server
- D. set the Maximum concurrent jobs value on the Disk Pool

Answer: A
