But they have to do it, ITCertTest provides [Valid VMCE20 P Test Sims](#) you not only with the best materials and also with excellent service.

#### **NEW QUESTION: 1**

You have a Lync Server 2013 infrastructure that contains two offices. The offices are located in Amsterdam and Seattle. The offices have the phone number ranges shown in the following table.

You plan to deploy Enterprise Voice.

You also plan to use a global dial plan that will use three-digit dialing. You need to create the normalization rules for the planned deployment. Which match patterns should you use to create the normalization rules?

To answer, drag the appropriate match patterns to the correct translation patterns in the answer area. Each match pattern may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content. Select and Place:

**Answer:**

Explanation:

Explanation:

First match pattern: 5 or 7 followed by any two numbers.

Second match pattern: 2 followed by any two numbers.

**NEW QUESTION: 2**

Refer to the exhibit.

IP phone 1 has MAC address of 1111.1111.1111, and IP phone 2 has MAC address of 2222.2222.2222.

The first two incoming calls were answered by IP phone 1, and the third incoming call was answered by IP phone 2.

Which option describes what will happen to the fourth incoming call?

- A. Neither phone rings and the call is forwarded to 2100.
- B. Both phones ring, but only IP phone 2 can answer the call.
- C. Neither phone rings and the call is forwarded to 2200.
- D. Both phones ring and either phone can answer the call.
- E. Both phones ring, but only IP phone 1 can answer the call.

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

IP Phone 1 & 2 both have busy-trigger-per-button configured to 3 & 2 respectively. So, the 4th incoming call will get forwarded to 2100 as busy-triggers are exceeding in IP Phones.

**NEW QUESTION: 3**

Given:

file1 and file2 are text files.

dir1 and dir2 are directories.

Which two commands will be successful?

- A. cp file% dir2
- B. cp file? dir1
- C. cp dir1 file1
- D. cp dir1 dir1
- E. cp file1 file2 dir1
- F. cp file. dir1

**Answer: B,E**

Explanation:

C: Here the wildcard character ? is used (Matches any single character). file1 and file2 will be copied into dir1

F: the two files file1 and file2 are copied into directory dir1.

Note: cp - copy files and directories

Copy SOURCE to DEST, or multiple SOURCE(s) to DIRECTORY.

Cp has three principal modes of operation. These modes are inferred from the type and count of arguments presented to the program upon invocation.

\*When the program has two arguments of path names to files, the program copies the contents of the first file to the second file, creating the second file if necessary.

\*When the program has one or more arguments of path names of files and following those an argument of a path to a directory, then the program copies each source file to the destination directory, creating any files not already existing.

\*When the program's arguments are the path names to two directories, cp copies all files in the source directory to the destination directory, creating any files or directories needed. This mode of

operation requires an additional option flag, typically r, to indicate the recursive copying of directories. If the destination directory already exists, the source is copied into the destination, while a new directory is created if the destination does not exist.

Reference: man cp

#### **NEW QUESTION: 4**

You are an administrator of an Azure subscription for your company.

Management asks you to configure Azure permissions for a user in your Azure Active Directory (Azure AD). The user must be able to perform all actions on the virtual machines (VMs). The user must not be allowed to create and manage availability sets for the Vms.

You need to implement the required permissions with the least administrative effort.

How should you assign permissions?

- A. Use Windows PowerShell to assign the Classic Virtual Machine Contributor role to the user.
- B. Implement a custom role through the Azure Portal and customize the role by adding the appropriate permissions.
- C. Use Windows PowerShell to create a custom role from the Virtual Machine Contributor role and then use

NotActions to customize the role permissions.

**D.** Assign the Virtual Machine Contributor role to the user.

**Answer: A**

Explanation:
