NEW QUESTION: 1

A penetration tester is connected to a client's local network and wants to passively identify cleartext protocols and potentially sensitive data being communicated across the network.

Which of the following is the BEST approach to take?

- A. Run a network vulnerability scan.
- B. Run an MITM attack.
- C. Run a stress test.
- D. Run a port scan.

Answer: B

NEW QUESTION: 2

Your company has a private cloud that is managed by using a System Center 2012 Operations Manager infra structure. You have a line-of-business web application named Appl. Appl stores its information in a dedicated Microsoft SQL Server 2008 database. You need to create a central diagram that contains the complete health information of Appl. You import the SQL, IIS, and Windows Server management packs. What should you create next?

- A. a dashboard view
- B. a distributed application model
- C. a Service Level Dashboard
- D. a diagram view

Answer: B

Explanation:

You need to create a distributed application first to be able to create the service level dashboard. First a DA, followed by a service level objective, and finally a Service Level Dashboard.
