Our Juniper JN0-635 Exam will provide you with free JN0-635 dumps questions with verified answers that reflect the actual exam, timing is everything.

#### **NEW QUESTION: 1**

Sie müssen sicherstellen, dass die Benutzer automatisch aufgefordert werden, ihr Kennwort zu ändern, wenn Azure Active Directory-Benutzer (Azure AD) über eine anonyme IP-Adresse über das Internet eine Verbindung zu Azure AD herstellen. Welchen Azure-Dienst sollten Sie verwenden?

- A.** Azure AD-Identitätsschutz
- B.** Azure AD Connect-Zustand

- C. Azure AD Privileged Identity Management
- D. Azure Advanced Threat Protection (ATP)

**Answer: A**

Explanation:

Azure AD Identity Protection includes two risk policies: sign-in risk policy and user risk policy. A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner.

There are several types of risk detection. One of them is Anonymous IP Address. This risk detection type indicates sign-ins from an anonymous IP address (for example, Tor browser or anonymous VPN). These IP addresses are typically used by actors who want to hide their login telemetry (IP address, location, device, etc.) for potentially malicious intent. You can configure the sign-in risk policy to require that users change their password.

<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-sign-in-risk-policy>

#### **NEW QUESTION: 2**

When you want to use an ADFV1X file to configure policies, where should you BEST configure this?

- A. User Settings
- B. Custom Resources
- C. Group Policies
- D. User Registry

**Answer: D**

#### **NEW QUESTION: 3**

An administrator needs to create a full clone desktop pool and reduce storage costs by using the SEsparse disk feature.

However, this option is not displayed in the Add Pool wizard. What is the likely reason that the administrator is prevented from enabling this option?

- A. SEsparse disks are not supported with NFS storage.
- B. SEsparse disks can be used only with linked-clone desktop pools.
- C. SEsparse disks are not supported by the storage vendor.
- D. SEsparse disks must be configured using PowerCLI.

**Answer: B**
