NEW QUESTION: 2

A company has five physical data centers in specific locations around the world. Each data center has hundreds of physical servers with a mix of Windows and Linux based applications and

database services Each data center also has an AVVS Direct Connect connection of 10 Gbps to AWS with a company-approved VPN solution to ensure that data transfer is secure The company needs to shut down the existing data centers as quickly as possible and migrate the servers and applications to AWS Which solution meets these requirements?

A. Install the AWS DataSync agent onto each physical machine Use the AWS Management Console to configure the destination to be an AMI and start the replication Once the replication is complete launch the Amazon EC2 instances created by the service

B. Install the CloudEndure Migration agent onto each physical machine Create a migration blueprint and start the replication Once the replication is complete, launch the Amazon EC2 instances in cutover mode.

C. Install the AWS Application Discovery Service agent onto each physical machine Use the AWS Migration Hub import option to start the replication Once the replication is complete, launch the Amazon EC2 instances created by the service

D. Install the AWS Server Migration Service (AWS SMS) connector onto each physical machine Use the AWS Management Console to select the servers from the server catalog and start the replication Once the replication is complete launch the Amazon EC2 instances created by the service

Answer: D
