**NEW QUESTION: 3**

When viewing successful Crystal Reports on demand, which server is it most beneficial for the Crystal Reports Page Server machine to be close to?

- A. Production Database Server
- B. Input File Repository Server
- C. Output File Repository Server
- D. Crystal Reports Cache Server

**Answer: A**

**NEW QUESTION: 4**

Which of the following best describes the role of the Managed Target Tier within the Logical view of the Management and Monitoring architecture?

- A. provides access to management content and operations and enables end users to access the appropriate business solution
- B. contains the named Infrastructure components that are required to be managed and monitored
- C. contains configuration details, historical metric data and alert Information, availability Information, and product and patch inventory Information
- D. provides Management Repository and Management Engine capabilities

**Answer: B**

Explanation:

The Managed Target Tier contains the named infrastructure components that are required to be managed and monitored. It is common to utilize a combination of agent based and gateway (a.k.a. proxy) patterns to monitor and manage hosted and

non-hosted targets.
