Drag and drop the characteristics from the left onto the correct infrastructure deployment types on the right.

Answer:

Explanation:

Explanation

On premise: customizable, specific requirements, resources

Cloud: scale, built-in automated backup, strong stable internet

NEW QUESTION: 2

Which compact flash on a Control/Switch processor of an Alcatel-Lucent 7750 router stores the runtime image and running configuration?

- A. CF 3
- B. CF 1
- C. Both A and B
- D. CF 2

Answer: A

NEW QUESTION: 3

To allow trust between Avaya Aura System Manager (SMGR) and Avaya Aura Messaging (AAM), there is a password set when you add the Trusted Server on AAM. This password must match with the password also configured in SMGR.

Which statement about the password in SMGR is true?

- A. It needs to match the Enrollment Password.
- B. It needs to match the admin password used to login to SMGR using a web browser.
- C. It needs to match the Attributes of the Messaging Managed Element in the Inventory.
- D. It needs to match the root password used to login to SMGR command line.

Answer: C

Explanation:

Configuring Messaging in the normal operational mode

Before you begin

* Add both the primary and secondary servers as Trusted Servers in the Messaging system.

* Update the Login, Password, and Confirm Password fields with the appropriate trusted server defined on the Messaging system.

Procedure

1. Log on to the Messaging system that System Manager manages.
2. Add the secondary System Manager server as Trusted Servers in the Messaging system.
3. Log on to the secondary System Manager server.
4. On the System Manager web console, click Services > Inventory.
5. In the left navigation pane, click Manage Elements.
6. On the Manage Elements page, select the Messaging system that you want to change to the secondary System Manager server.
7. Click Edit.
8. On the Attributes tab, fill the Login, Password, and Confirm Password fields with the corresponding name and password of the Messaging trusted server.
9. Click Commit.
10. Click Inventory > Synchronization > Messaging System, and select the required Messaging element.
11. Click Now.

The secondary System Manager server retrieves all data from Messaging and is now ready to administer and manage Messaging.
