NEW QUESTION: 3

Scenario:

Currently, many users are experiencing problems using their AnyConnect NAM supplicant to login to the network. The network support staff have already examined and verified the AnyConnect NAM configuration is correct.

In this simulation, you are tasked to examine the various ISE GUI screens to determine the ISE current configurations to help isolate the problems. Based on the current ISE configurations, you will need to answer three multiple choice questions.

To access the ISE GUI, click on the ISE icon in the topology diagram to access the ISE GUI.

Not all the ISE GUI screens are operational in this simulation and some of the ISE GUI operations have been reduced in this simulation.

Not all the links on each of the ISE GUI screens work, if some of the links are not working on a screen, click Home to go back to the Home page first. From the Home page, you can access all the required screens.

To view some larger GUI screens, use the simulation window scroll bars. Some of the larger GUI screens only show partially but will include all information required to complete this simulation.

Which of the following statements is correct?

- A.** Currently, IT users who successfully authenticate will be assigned to VLAN 9.
- B.** Currently, IT users who successfully authenticate will have their packets tagged with a SGT of 3.
- C.** Currently, any domain administrator who successfully authenticates will be assigned to VLAN 10.
- D.** Print Servers matching the Linksys-PrintServer identity group will have the following access restrictions:
permit icmp any host 10.10.2.20 permit tcp any host 10.10.2.20 eq 80 permit icmp any host 10.10.3.20 permit tcp any host 10.10.3.20 eq 80 deny ip any any
- E.** Computers belonging to the secure-x domain which pass machine authentication but failed user authentication will have the Employee_Restricted_DACL applied.

Answer: C

NEW QUESTION: 4

You write code to retrieve an experiment that is run from your Azure Machine Learning workspace.

The run used the model interpretation support in Azure Machine Learning to generate and upload a model explanation. Business managers in your organization want to see the importance of the features in the model. You need to print out the model features and their relative importance in an output that looks similar to the following.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: `from_run_id`

`from_run_id(workspace, experiment_name, run_id)`

Create the client with factory method given a run ID.

Returns an instance of the `ExplanationClient`.

Parameters

* `Workspace` `Workspace` An object that represents a workspace.

* `experiment_name` `str` The name of an experiment.

* `run_id` `str` A GUID that represents a run.

Box 2: `list_model_explanations`

`list_model_explanations` returns a dictionary of metadata for all model explanations available.

Returns

A dictionary of explanation metadata such as `id`, `data type`, `explanation method`, `model type`, and `upload time`, sorted by

`upload time` Box 3: `explanation` Reference:

https://docs.microsoft.com/en-us/python/api/azureml-contrib-interpret/azureml.contrib.interpret.explanation.explanation_client.explanationclient?view=azure-ml-py
