In accordance with the best practices, which vCenter object should the provider virtual data reference?

**A.** data center

- B. folder
- C. cluster
- D. resource pool

**Answer: D**

**NEW QUESTION: 2**

You are an ML engineer at a global car manufacturer. You need to build an ML model to predict car sales in different cities around the world. Which features or feature crosses should you use to train city-specific relationships between car type and number of sales?

- A. Two feature crosses as a element-wise product the first between binned latitude and one-hot encoded car type, and the second between binned longitude and one-hot encoded car type
- B. One feature obtained as an element-wise product between latitude, longitude, and car type
- C. One feature obtained as an element-wise product between binned latitude, binned longitude, and one-hot encoded car type
- D. Three individual features binned latitude, binned longitude, and one-hot encoded car type

**Answer: C**

**NEW QUESTION: 3**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You plan to deploy multiple instances of an Azure web app across several Azure regions.

You need to design an access solution for the app. The solution must meet the following replication requirements:

Support rate limiting.

Balance requests between all instances.

Ensure that users can access the app in the event of a regional outage.

Solution: You use Azure Load Balancer to provide access to the app.

Does this meet the goal?

A. Yes

B. No

**Answer: B**

Explanation:

Explanation

Load Balancer distributes inbound flows that arrive at the load balancer's front end to backend pool instances but it does not

provide high availability at the regional level.
