ASA2 is configured for the clientless SSL VPN connection with  
DNS server at  
150.1.7.200 that is reachable only from the Management0/0  
interface. The incoming VPN session will be received on outside  
interface with authentication credentials Username: ccie,  
Password: ccie. ASA 2 is configured for the self-signed  
certificate with trustpoint "ccietrust" enabled for the outside  
interface. It has been reported that resources accessibility is  
timing out after the VPN connection establishment.  
What could be the reason?  
A. The tunnel group is tied up with the incorrect group policy  
B. Incorrect banner value in the group policy  
C. Webvpn needs to be enabled on the management interface  
D. The CA trustpoint "ccietrust" has incorrect keypair
```

- E. The "ccieacl" should be configured for port 443
 - F. The domain-lookup should be performed from management interface
 - G. Management interface has incorrect security level configured
- Answer: F**

NEW QUESTION: 2

Database as a Service (DBaaS) is a cloud service that provides a database instance in the cloud. It is managed and maintained by the cloud provider, and you can access it from anywhere. DBaaS is a good option for organizations that want to avoid the complexity and cost of managing their own database infrastructure.

- A. It is a managed service that provides a database instance in the cloud.
- B. Oracle is a cloud provider that offers DBaaS.
- C. Amazon is a cloud provider that offers DBaaS.
- D. Microsoft is a cloud provider that offers DBaaS.
- E. IBM is a cloud provider that offers DBaaS.

Answer: A,D

NEW QUESTION: 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to recommend an integration strategy for the build process of a Java application. The solution must meet the following requirements:

- * The builds must access an on-premises dependency management system.
- * The build outputs must be stored as Server artifacts in Azure DevOps.
- * The source code must be stored in a Git repository in Azure DevOps.

Solution: Install and configure a self-hosted build agent on an on-premises machine. Configure the build pipeline to use the Default agent pool. Include the Java Tool Installer task in the build pipeline.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Explanation

Instead use Octopus Tentacle.

NEW QUESTION: 4

Your company has a main office and four branch offices. The main office is located in London.

The network contains an Active Directory domain named contoso.com. The network is configured as shown in the exhibit. (Click the Exhibit button.)

Each office contains several servers that run Windows Server 2012.

In each branch office, you plan to deploy an additional 20 servers that will run Windows Server 2012. Some of the servers will have a Server Core installation of Windows Server 2012. You identify the following requirements for the deployment of the new servers:

Operating system images must be administered centrally.

The operating system images must be deployed by using PXE.

The WAN traffic caused by the deployment of each operating system must be minimized.

You need to recommend a solution for the deployment of the new servers.

What should you recommend?

Exhibits

A. Deploy Windows Deployment Services (WDS) in the main office only. Replicate the images by using Distributed File System (DFS) Replication.

B. Deploy Windows Deployment Services (WDS) in each office. Replicate the images by using Distributed File System (DFS) Replication,

C. Deploy Windows Deployment Services (WDS) in each office. Copy the images by using BranchCache.

D. Deploy Windows Deployment Services (WDS) in the main office only. Copy the images by using BranchCache.

Answer: B
