Our standard is that No Help, Full Refund, The Best Opportunity to Groom Your Profile, We offer you free demo to have a try before buying Professional-Cloud-Network-Engineer training materials, so that you can know what the complete version is like.

Some of the salient features of Professional-Cloud-Network-Engineer Braindumps and services of the Exams VCE are given below.

NEW QUESTION: 1

Your development team has started using AWS resources for development purposes. The AWS account has just been created. Your IT Security team is worried about possible leakage of AWS keys. What is the first level of measure that should be taken to protect the AWS account.

Please select:

- A. Create IAM Roles
- B. Delete the AWS keys for the root account
- C. Create IAM Groups

D. Restrict access using IAM policies

Answer: B

Explanation:

Explanation

The first level or measure that should be taken is to delete the keys for the IAM root user. When you log into your account and go to your Security Access dashboard, this is the first step that can be seen.

Option B and C are wrong because creation of IAM groups and roles will not change the impact of leakage of AWS root access keys. Option D is wrong because the first key aspect is to protect the access keys for the root account. For more information on best practices for Security Access keys, please visit the below URL:

<https://docs.aws.amazon.com/eeneral/latest/gr/aws-access-keys-best-practices.html>

The correct answer is: Delete the AWS keys for the root account. Submit your Feedback/Queries to our Experts.

NEW QUESTION: 2

Refer to the exhibit:

This configuration is being applied on an IOS XR router. Which statement about this configuration is true?

- A. It is used to identify MIB entries and has a list of YANG models
- B. It is used to create a subscription to specify the streaming interval
- C. It is used to identify traps for SNMP polling
- D. It is used to create a sensor-group and has a list of YANG models for streaming

Answer: D

NEW QUESTION: 3

Refer to the exhibit. Which statement is true?

- A. The configuration is used to create a subscription to specify the streaming interval
- B. The configuration is used to identify traps for SNMP polling
- C. The configuration is used to identify MIB entries and has a list of YANG models
- D. The configuration is used to create a sensor-group and has a list of YANG models for streaming

Answer: C
