- A. humongousinsurance.onmicrosoft.com
- B. humongousinsurance.local
- C. humongousinsurance.com
- D. ad.humongousinsurance.com

Answer: C

Explanation:

Every Azure AD directory comes with an initial domain name in the form of domainname.onmicrosoft.com.

The initial domain name cannot be changed or deleted, but you can add your corporate domain name to Azure AD as well. For example, your organization probably has other domain names used to do business and users who sign in using your corporate domain name. Adding custom domain names to Azure AD allows you to assign user names in the directory that are familiar to your users, such as '[\[email protected\]](#)' instead of '[\[email protected\]](#) name.onmicrosoft.com'.

Scenario:

Network Infrastructure: Each office has a local data center that contains all the servers for that office. Each office has a dedicated connection to the Internet.

Humongous Insurance has a single-domain Active Directory forest named humongousinsurance.com
Planned Azure AD Infrastructure:
The on-premises Active Directory domain will be synchronized to Azure AD.

Topic 3, Contoso Ltd

Overview

Contoso, Ltd. is a manufacturing company that has offices worldwide. Contoso works with partner organizations to bring products to market.

Contoso products are manufactured by using blueprint files that the company authors and maintains.

Existing Environment

Currently, Contoso uses multiple types of servers for business operations, including the following:

- * File servers
- * Domain controllers
- * Microsoft SQL Server servers

Your network contains an Active Directory forest named contoso.com. All servers and client computers are joined to Active Directory.

You have a public-facing application named Appl. Appl is comprised of the following three tiers:

- * A SQL database
- * A web front end
- * A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Requirements

Planned Changes

Contoso plans to implement the following changes to the infrastructure:

Move all the tiers of Appl to Azure.

Move the existing product blueprint files to Azure Blob storage.

Create a hybrid directory to support an upcoming Microsoft Office 365 migration project.

Technical Requirements

Contoso must meet the following technical requirements:

- * Move all the virtual machines for Appl to Azure.
- * Minimize the number of open ports between the Appl tiers.
- * Ensure that all the virtual machines for Appl are protected by backups.
- * Copy the blueprint files to Azure over the Internet.
- * Ensure that the blueprint files are stored in the archive storage tier.
- * Ensure that partner access to the blueprint files is secured and temporary.

- * Prevent user passwords or hashes of passwords from being stored in Azure.
- * Use unmanaged standard storage for the hard disks of the virtual machines.
- * Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.

Minimize administrative effort whenever possible.

User Requirements

Contoso identifies the following requirements for users:

- * Ensure that only users who are part of a group named Pilot can join devices to Azure AD.
- * Designate a new user named Admin1 as the service administrator of the Azure subscription.
- * Admin1 must receive email alerts regarding service outages.
- * Ensure that a new user named User3 can create network objects for the Azure subscription.

NEW QUESTION: 2

A client notices that their engineers often make mistakes when creating Amazon SQS queues for their backend system. Which action should a Solutions Architect recommend to improve this process?

- A.** Use AWS Elastic Beanstalk to automatically create the Amazon SQS queues.
- B.** Use the AWS CLI to create queues using AWS IAM Access Keys.
- C.** Write a script to create the Amazon SQS queue using AWS Lambda.
- D.** Use AWS CloudFormation Templates to manage the Amazon SQS queue creation.

Answer: D

NEW QUESTION: 3

Which of the following is NOT one of the 'seven principles of public life', as defined by the Committee of Standards in Public Life?

- A.** Objectivity
- B.** Integrity
- C.** Openness
- D.** Confidence

Answer: D
