Every step is easy for you to follow, We can guarantee you pass 5V0-22.21 exam 100%.

NEW QUESTION: 1

Which of the following is a valid IPv4 address?
A. 192.168.0.0
B. 192.168.0.1
C. 192.168.0.255
D. 192.168.0.256

Answer: B

Answer :

Once the VNets are peered, all resources on one VNet can communicate with resources on the other peered VNets. You plan to enable peering between Paris-VNet and AllOffices-VNet. Therefore VMs on Subnet1, which is on Paris-VNet and VMs on Subnet3, which is on AllOffices-VNet will be able to connect to each other.

All Azure resources connected to a VNet have outbound connectivity to the Internet by default. Therefore VMs on ClientSubnet, which is on ClientResources-VNet will have access to the Internet; and VMs on Subnet3 and Subnet4, which are on AllOffices-VNet will have access to the Internet.
