NEW QUESTION: 1

Which management process ensures business continuity by eliminating single points of failure in a data center?

- A. Performance management
- B. Security management
- C. Availability management
- D. Capacity management

Answer: C

NEW QUESTION: 2

Your customer accounts revenue based on product class category. Because all your customer's projects are funded by private and government institutions, they decide to classify all projects based on their funding source to accurately report on revenue in

General Ledger. Accordingly, you create a new class category "Funding Source", and assign it to all projects. However, you notice that the accounting is still happening based on product class category.

Identify the reason for this problem. (Choose the best answer.)

- A. Funding source class category is not enabled for "available as accounting source".
- B. Funding source class category is assigned to all project types.
- C. Funding source class category is enabled for "available as accounting source".
- D. Product class category is not enabled for "available as accounting source".

Answer: D
