The existing weakness is that you can see [XK0-004 Exam Test](#) the questions' answers all the time in your practice, not like a real exam.

NEW QUESTION: 1

- A. Option A
- B. Option B
- C. Option C

Answer: C

Explanation:

Explanation

This is given as a practice in the Green Deployment Guides

A blue group carries the production load while a green group is staged and deployed with the new code. When it's time to deploy, you simply attach the green group to the existing load balancer to introduce traffic to the new environment. For

HTTP/HTTP'S listeners, the load balancer favors the green Auto Scaling group because it uses a least outstanding requests routing algorithm. As you scale up the green Auto Scaling group, you can take blue Auto Scaling group instances out of service by either terminating them or putting them in Standby state. For more information on Blue Green Deployments, please refer to the below document link: from AWS
