- A. 0
- B. 1
- C. 2
- D. 3

**Answer: B**

**NEW QUESTION: 2**

Which two Cisco IOS AAA features are available with the local database? (Choose two.)

- A. command authorization
- B. network access authentication
- C. network accounting
- D. network access authorization

**Answer: A,B**

Explanation:

Configuring the Local Database

This section describes how to manage users in the local database. You can use the local database for CLI access authentication, privileged mode authentication, command authorization, network access authentication, and VPN authentication and authorization. You cannot use the local database for network access authorization. The local database does not support accounting.
