- B. Option F
- C. Option G
- D. Option D
- E. Option A
- F. Option E
- G. Option C

Answer: C

Explanation:

The SQL Server Audit feature enables you to audit server-level and database-level groups of events and individual events. Audits can have the following categories of actions:

- Server-level. These actions include server operations, such as management changes and logon and logoff operations.
- Database-level. These actions encompass data manipulation

languages (DML) and data definition language (DDL) operations. Audit-level. These actions include actions in the auditing process.
