NEW QUESTION: 1

You are a Dynamics 365 for Finance and Operations system administrator.

Users have been creating advanced queries for filter data on forms. They want to be able to save the filter data for later use and access those views when they log in.

You need to instruct them in how to do this.

Which four actions should end users perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer :

Explanation:

NEW QUESTION: 2

The system administrator is reviewing the following logs from the company web server:

```
12:34:56 GET /directory_listing.php?user=admin&pass=admin1
12:34:57 GET /directory_listing.php?user=admin&pass=admin2
12:34:58 GET /directory_listing.php?user=admin&pass=ladmin
12:34:59
```

GET /directory_listing.php?user=admin&pass=2admin Which of the following is this an example of?

- A. Offline brute force attack
- B. Online rainbow table attack
- C. Online hybrid attack
- D. Offline dictionary attack

Answer: C

Explanation:

This is an example of an online hybrid attack. A hybrid attack is a combination of attacks. In this example, we have a combination of a dictionary attack and a brute-force attack. A brute force attack is a trial-and-error method used to obtain information such as a user password or personal identification number (PIN). In a brute force attack, automated software is used to generate a large number of consecutive guesses as to the value of the desired data. A dictionary attack uses a list of words to use as passwords. The combination or hybrid attack adds characters or numbers or even other words to the beginning or end of the password guesses. In this example we have a password guess of 'admin'. From the word admin, we have four combinations, 'admin1, ladmin, admin2, 2admin'.

NEW QUESTION: 3

For which of the following instances is System Restore MOST likely to be used?

- A. Replacing a failed hard drive with a new drive.
- B. Deleting temporary files that are not needed.
- C. Placing the system configuration into a prior state.
- D. Downgrading an operating system to another version.

Answer: C

NEW QUESTION: 4

Welcher der folgenden Vorteile ist der Hauptvorteil eines etablierten Governance-Rahmens für die Informationssicherheit, wenn eine Organisation neue Technologien einführt?

- A. Eine neue Technologiestrategie wäre vorhanden.
- B. Ein Kosten-Nutzen-Analyseprozess wäre einfacher durchzuführen.
- C. Die Akzeptanz neuer Technologien durch Endbenutzer wurde festgestellt.
- D. Ein effektiver Sicherheitsrisikomanagementprozess wird eingerichtet.

Answer: D
