NEW QUESTION: 2

- A. STORED AS TEXTFILE
- B. STORED AS RCFILE
- C. STORED AS ORC
- D. STORED AS GZIP

Answer: C

Explanation:

Explanation

The Optimized Row Columnar (ORC) file format provides a highly efficient way to store Hive data. It was designed to overcome limitations of the other Hive file formats. Using ORC files improves performance when Hive is reading, writing, and processing data.

Compared with RCFile format, for example, ORC file format has many advantages such as:

- a single file as the output of each task, which reduces the NameNode's load
- Hive type support including datetime, decimal, and the complex types (struct, list, map, and union)
- light-weight indexes stored within the file skip row groups that don't pass predicate filtering
- seek to a given row
- block-mode compression based on data type run-length encoding
- for integer columns
- dictionary encoding for string columns
- concurrent reads of the same file using separate RecordReaders
- ability to split files without scanning for markers
- bound the amount of memory needed for reading or writing metadata
- stored using Protocol Buffers, which allows addition and removal of fields
