Nobody wants to get stuck at same place for years, [Study HMJ-1217 Reference](#) so new skills are required in the IT industry, It is clear that you can find out your drawback of the knowledge through taking part in the mock OMG-OCEB2-FUND100 : OMG-Certified Expert in BPM 2 - Fundamental exam, thus you can have a comprehensive grasp of the subject.

Whether you had attempted OMG-OCEB2-FUND100 (OMG Certified Technician for Data Center) exam before and you were not successful in that attempt of OMG-OCEB2-FUND100 exam Or you are a complete newbie.

Now, you can relax yourself because of our good OMG OMG-OCEB2-FUND100 exam torrent.

NEW QUESTION: 1

Which plan provides the Business Case with costs during the Initiating a Project process?

- A. Project Plan
- B. Stage Plan
- C. Initiation Stage Plan
- D. Team Plan

Answer: A

NEW QUESTION: 2

Note: The question is part of a series of questions that use the same or similar answer choices. An answer choice may be

correct for more than one question in the series. Each question is independent of the other question in the series. Information and details provided in a question apply only to that question. You have a database named DB1. The database does not use a memory-optimized filegroup. The database contains a table named Table1. The table must support the following workloads:

You need to add the most efficient index to support the new OLTP workload, while not deteriorating the existing Reporting query performance.

What should you do?

- A. Create a clustered columnstore index on the table.
- B. Create a nonclustered columnstore index on the table.
- C. Create a nonclustered index on the table.
- D. Create a hash index on the table.
- E. Create a nonclustered filtered index on the table.
- F. Create a clustered index on the table.

Answer: E

Explanation:

Explanation/Reference:

Explanation:

A filtered index is an optimized nonclustered index, especially suited to cover queries that select from a well-defined subset of data. It uses a filter predicate to index a portion of rows in the table. A well-designed filtered index can improve query performance, reduce index maintenance costs, and reduce index storage costs compared with full-table indexes.
