A. No

B. Yes

Answer: A

NEW QUESTION: 2

You are monitoring and evaluating a create index statement on your Database Machine and have run the following query after executing statement, providing the output. Shown:

Select two reasons why the statement would have produced so many "cell single block physical read" waits compared to "cell smart table scan" waits.

- A. There is a ROWID column in the table on which the index is being built.
- B. There are huge numbers of migrated rows in the table on which the index is being built.
- C. There is a transaction that has modified one block of the table on which the index is being built in each cell, which committed after the create index began.
- D. There is an uncommitted transaction that has modified one block of the table on which the index is being built, in each cell.
- E. There are huge numbers of chained rows in the table on which the index is being built.

Answer: B,E

Explanation:

Explanation/Reference:

A: It could be that row migration.

D: It could be that row migration or chained rows could cause it.

Note:

* Some facts about scans:

Scans exists in "OLTP" systems

Exadata smart scan requires a direct path read.

A direct path read is chosen at runtime based on internal heuristics

The STORAGE clause in an explain plan doesn't necessarily mean you will perform a smart scan.

* The buffer caching in certain "OLTP" environments can occasionally induce conventional reads when smart scan is faster.

* Typically see cell multiblock physical read instead of cell smart table scan waits

* No one-size-fits-all solution can be given here but it is very fixable.

NEW QUESTION: 3

Which of the following is the PRIMARY responsibility of an organization's IT steering committee?

- A. Identifying new technological threats
- B. Reporting on key performance measures
- C. Conducting peer reviews of other organizations
- D. Communicating strategic goals to IT project teams

Answer: A

NEW QUESTION: 4

Which two configurations are acceptable for base and advanced licenses? (Choose two)

- A. 1500 baselicense, no advancedlicense
- B. 1000 baselicense, 500 advanced licenses
- C. 250 base licenses, 500 advanced licenses
- D. no base licenses, 750 advanced licenses

Answer: A, B
