Users can set the test time by themselves and the layout as personal like.

NEW QUESTION: 1

Users have reported poor performance when streaming videos from media sites. A network technician runs several online speed tests from a user's computer and consistently receives an estimated bandwidth of 5Mbps downstream and 2Mbps upstream. The technician then pings one of the streaming servers and receives the following:

Based on the above information, which of the following is the MOST likely cause of the poor video-streaming performance?

- A.** A network administrator has applied a throttling policy for video streaming.
- B.** The downstream bandwidth is too low to support streaming video.
- C.** There is packet loss on the WAN connection that is causing poor performance.
- D.** The router does not have enough processing power to provide consistent video streams.
- E.** The upstream bandwidth is too low to support streaming video.

Answer: D

NEW QUESTION: 2

- A. Option D
- B. Option A
- C. Option C
- D. Option B

Answer: D

NEW QUESTION: 3

A user is accessing an EC2 instance on the SSH port for IP 10.20.30.40. Which one is a secure way to configure that the instance can be accessed only from this IP?

- A. In the security group, open port 22 for IP 10.20.30.40
- B. In the security group, open port 22 for IP 10.20.30.40/32
- C. In the security group, open port 22 for IP 10.20.30.40/0
- D. In the security group, open port 22 for IP 10.20.30.40/24

Answer: B

Explanation:

In AWS EC2, while configuring a security group, the user needs to specify the IP address in CIDR notation. The CIDR IP range 10.20.30.40/32 says it is for a single IP 10.20.30.40. If the user specifies the

IP as 10.20.30.40 only, the security group will not accept and ask it in a CIRD format.
