Our 4A0-210 learning materials: Nokia Optical Network Management with NFM-T is efficient and accurate and will be suitable for you, 4A0-210 dumps VCE is more popular actually, UPDATED CONTENT.

They are as follows.

NEW QUESTION: 1

A network contains the computers described in the following table.

All users work in a Remote Desktop Services (RDS) environment. You migrate 15 client computers that run Windows XP to Windows 7. During a license audit you discover that you are using 15 more RDS device client access licenses (CALs) than required. You need to ensure that the number of issued RDS CALs matches the number of client devices currently in service in the least amount of time.

What should you recommend? (More than one answer choice may achieve the goal. Select the BEST answer.)

A. Reset the licensing database path by modifying the Discovery Scope configuration.

- B. Use the RDS Licensing Manager console to revoke the unnecessary Windows XP device CALs.
- C. From the Remote Desktop Session Host Configuration console, run the Licensing Diagnostics tool.
- D. Wait until the RDS licensing server reclaims the unnecessary licenses.

Answer: B

NEW QUESTION: 2

You are administering SQL Server Integration Services (SSIS) permissions on a production server that runs SQL Server 2012. Quality Assurance (QA) testers in the company must have permission to perform the following tasks on specific projects:

- * View and validate projects and packages
- * View Environments and Environment variables
- * Execute packages

You need to grant the minimum possible privileges to the QA testers.

What should you do? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Grant Read permission in the SSIS catalog folder, the projects, and the Environments to the QA Tester logons.
- B. In the msdb database, add QA Tester logons to the db_ssisItduser role.
- C. Grant Modify permission in the projects to the QA Tester logons.
- D. In the msdb database, add QA Tester logons to the db_ssisoperator role.
- E. In the SSISDB database, add QA Tester logons to the ssis_admin role.
- F. Grant Execute permission in the projects to the QA Tester logons.

Answer: A,D

NEW QUESTION: 3

DRAG DROP

Answer:

Explanation:

Explanation:

You can use the Set-CSClientPolicy cmdlet with the EnableSkypeUI parameter to specify the client experience the users in your organization will see. To force the display of the Lync user interface when users launch the Skype for Business client for the first time, you should confirm that the value of EnableSkypeUI is set to \$False

in the policy you are using.

The registry update to display the Lync client experience the first time a user launches the Skype for Business client can be done using a Group Policy Object (GPO).
