NEW QUESTION: 1

Joe, an end-user, reports that the PC he uses periodically logs off his user account and displays a message that updates are being installed. Which of the following is the MOST likely cause of this issue?

- A. Remote desktop is enabled and an administrator has logged into the machine
- B. Time of day restrictions are enabled on the machine
- C. Scheduled antivirus scans and updates are enabled on the machine
- D. Automatic Windows Update is enabled on the machine

Answer: D

NEW QUESTION: 2

Universal Containers has an active production org; and they are planning to release some new features to it next month. The team is working to prepare .1 deployment plan and reached out to the technical architect for inputs on rollback strategy. What should a technical architect recommend?

- A. Backup the existing metadata using the ANT Migration Tool. To roll back deployment, deploy again to production using backed up metadata.
- B. Backup the existing metadata using ANT Migration Tool. To roll back deployment, manually delete new components and deploy again to production using backed up metadata.
- C. Create a sandbox from production to take the backup of existing metadata. To roll back deployment, manually delete new components and then deploy again to production using metadata from this sandbox.
- D. Create a sandbox from production to take the backup of existing metadata. To roll back deployment, use destructivechanges.xml to delete new components and then deploy again to production using metadata from this sandbox.

Answer: D

NEW QUESTION: 3
