And do you want to feel the true exam in advance, Therefore, the ACP-Cloud1 guide torrent can help users pass the qualifying examinations that they are required to participate in faster and more efficiently.

And whatever the version is the users can learn the ACP-Cloud1 guide torrent at their own pleasures, If you would like to get ACP-Cloud1 test dumps or ACP-Cloud1 VCE engine, then right now you are in the right place.

The competition in the IT industry is very fierce, There are so many advantages of our ACP-Cloud1 study materials, and as long as you free download the demos on our website, then you will know that how good quality our ACP-Cloud1 exam questions are in!

NEW QUESTION: 1

Where should the build and release agents for the investment planning application suite run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: A source control system

A source control system, also called a version control system, allows developers to collaborate on code and track changes. Source control is an essential tool for multi-developer projects.

Box 2: A hosted service

To build and deploy Xcode apps or Xamarin.iOS projects, you'll need at least one macOS agent. If your pipelines are in Azure Pipelines and a Microsoft-hosted agent meets your needs, you can skip setting up a self-hosted macOS agent.

Scenario: The investment planning applications suite will include one multi-tier web application and two iOS mobile applications. One mobile application will be used by employees; the other will be used by customers.
