NEW QUESTION: 1

- A. Option C
- B. Option D
- C. Option B

D. Option A

Answer: C,D

Explanation:

Explanation

The AWS documentation mentions the following

You can run an AWS Lambda function that logs an event whenever an Auto Scaling group launches or terminates an Amazon EC2 instance and whether the launch or terminate event was successful.

For more information on configuring lambda with Cloudwatch events for this scenario, please visit the URL:

<http://docs.aws.amazon.com/AmazonCloudWatch/latest/events/LogASGroupState.html>

NEW QUESTION: 2

You recently created a global option set with the values North, South, and West. The global option set values should always remain the same.

You need to add an option set to an entity with the values North, South, West, and East.

What should you do?

- A.** Create an option set field for the entity that uses the global option set. Set the default value for the entity option set to East.
- B.** Create an option set field for the entity that uses the global option set. Add the value East to the entity option set.
- C.** Create an option set for the entity. Add the values North, South, West, and East to it.
- D.** Create an option set field for the entity that uses the global option set and set the field type to calculated. Add an action that adds East as a value to the option set when the form loads.

Answer: C
