NEW QUESTION: 1

If you encounter errors after transferring the batch using the Load Initial Balances process, what must you do?

- A. Correct the errors, create a new batch, validate and transfer the batch again.
- B. Perform a rollback, correct the errors, create a new batch, validate and transfer the batch again.
- C. Undo the batch, correct the errors, validate and transfer the batch again.
- D. Correct the errors, delete the batch, create a new batch, validate and transfer the batch again.

Answer: C

NEW QUESTION: 2

You plan to create a SharePoint Business Process Automation (BPA) project.

You need to process items for approval with the least amount of developer effort.

Which tool should you use?

- A. Out-of-the-box workflow
- B. SharePoint Designer workflow
- C. Work Item Timer Job
- D. Remote Event Receiver

Answer: A

Explanation:

Workflows in SharePoint 2013 allow you to model and automate business processes. These business processes can be as simple as a document approval process with a single approver (shown in example below), as complex as customer-facing product catalog using web service calls and database support, or as formidable as virtually any structured business process, full of conditions, loops, user inputs, tasks, and custom actions.

Example: Simple SharePoint workflow

Reference: [Get started with workflows in SharePoint 2013](#)

NEW QUESTION: 3

Which of the following is a cloud-based service that can be used to store and manage data in the cloud?

- A. Cloud apps
- B. Voicemail
- C. Mobile
- D. Backups

E. Endpoints

Answer: C,E
