Topic 2, Contoso Ltd

Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear.

This screen allows you to review your answers and to make changes before you move to the next section of the exam. After

you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd, is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York. Contoso has the users and computers shown in the following table.

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments.

Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment

The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft System Center Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organization unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

Requirements

Planned Changes

Contoso plans to implement the following changes:

- * Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.

- * Start using a free Microsoft Store for Business app named Appl.

- * Implement co-management for the computers.

Technical Requirements:

Contoso must meet the following technical requirements:

- * Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.

- * Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- * Monitor the computers in the LEG department by using Windows Analytics.
- * Create a provisioning package for new computers in the HR department.
- * Block iOS devices from sending diagnostic and usage telemetry data.
- * Use the principle of least privilege whenever possible.
- * Enable the users in the MKG department to use Appl.
- * Pilot co-management for the IT department.

Answer: A,C

NEW QUESTION: 3

Which statements about antivirus scanning mode are true? (Choose two.)

- A.** In proxy-based inspection mode, if a virus is detected, a replacement message may not be displayed immediately.
- B.** In flow-based inspection mode, you can use the CLI to configure antivirus profiles to use protocol option profiles.
- C.** In proxy-based inspection mode antivirus buffers the whole file for scarring before sending it to the client.
- D.** In quick scan mode, you can configure antivirus profiles to use any of the available signature data bases.

Answer: B,C

Explanation:

Explanation

A: Buffers the whole file, packets sent to the client after scan finishes- B: When the antivirus profile is operating in flow-based inspection mode, two scanning mode options are available: full scan mode and quick scan mode.(Normal extended, or extreme-depending on what is configured in the CLI).
