Answer: B

Explanation:

<http://searchstorage.techtarget.com/definition/network-attached-storage>

NEW QUESTION: 4

The Consistency Checker checks_____.

- A. The validity of objects outside the metadata using the connection
- B. Syntax errors in derived logical columns
- C. For objects deleted from the database
- D. Mappings to the physical objects

Answer: D

Explanation:

Consistency check is one of the process to check whether a repository is yielding proper results in Answer reports. It checks whether;

- * All logical columns are mapped correctly to physical columns (B).
- * All logical dimension tables have a logical key.
- * There are at least two logical tables in the business model; one is a logical fact table, the other is logical dimension table with join condition.
- * There are no circular logical join relationships.
- * A presentation catalog exists for the business model.
