Answer: B

Explanation:

Explanation

An Azure AD DS DNS zone should only contain the zone and records for the managed domain itself.

A conditional forwarder is a configuration option in a DNS server that lets you define a DNS domain, such as contoso.com, to forward queries to. Instead of the local DNS server trying to resolve queries for records in that domain, DNS queries are forwarded to the configured DNS for that domain. This configuration makes sure that the correct DNS records are returned, as you don't create a local a DNS zone with duplicate records in the managed domain to reflect those resources.

To create a conditional forwarder in your managed domain, complete the following steps:

1. Select your DNS zone, such as aaddscontoso.com.
2. Select Conditional Forwarders, then right-select and choose New Conditional Forwarder...
3. Enter your other DNS Domain, such as contoso.com, then enter the IP addresses of the DNS servers for that namespace, as shown in the following example:

4. Check the box for Store this conditional forwarder in Active Directory, and replicate it as follows, then select the option for All DNS servers in this domain, as shown in the following example:

5. To create the conditional forwarder, select OK. Name resolution of the resources in other namespaces from VMs connected to the managed domain should now resolve correctly. Queries for the DNS domain configured in the conditional forwarder are passed to the relevant DNS servers.

NEW QUESTION: 3

SZENARIO

Bitte verwenden Sie Folgendes, um die nächste Frage zu beantworten:

Liem, ein Online-Händler, der für seine umweltfreundlichen Schuhe bekannt ist, hat kürzlich seine Präsenz in Europa ausgebaut. In dem Bestreben, die Marktbeherrschung zu erlangen, hat sich Liem mit einem anderen umweltfreundlichen Unternehmen zusammengetan, EcoMick, das Accessoires wie Gürtel und Taschen verkauft. Gemeinsam erstellten die Unternehmen eine Reihe von Marketingkampagnen, um die ökologischen und wirtschaftlichen Vorteile ihrer Produkte herauszustellen. Nach monatelanger Planung haben Liem und EcoMick eine Vereinbarung zum Datenaustausch geschlossen, um dieselbe Marketingdatenbank, MarketIQ, zu verwenden und die Kampagnen an ihre jeweiligen Kontakte zu senden.

Liem und EcoMick haben außerdem eine Datenverarbeitungsvereinbarung mit MarketIQ geschlossen, deren Bedingungen die Verarbeitung personenbezogener Daten nur auf Anweisung von Liem und EcoMick und die Bereitstellung aller Informationen zum Nachweis der Einhaltung der DSGVO-Verpflichtungen beinhalteten.

Anschließend haben Liem und EcoMick die Dienste eines Unternehmens namens JaphSoft in Anspruch genommen, einer Marketingoptimierungsfirma, die maschinelles Lernen einsetzt, um Unternehmen bei der Durchführung erfolgreicher Kampagnen zu unterstützen. Kunden stellen JaphSoft die persönlichen Daten von Personen zur Verfügung, auf die sie in jeder Kampagne abzielen möchten. Um den Schutz der Kundendaten zu gewährleisten, implementiert JaphSoft die technischen und organisatorischen Maßnahmen, die es für angemessen hält. JaphSoft arbeitet daran, seine Modelle für maschinelles Lernen kontinuierlich zu verbessern, indem die von seinen Kunden

erhaltenen Daten analysiert werden, um die erfolgreichsten Komponenten einer erfolgreichen Kampagne zu ermitteln. JaphSoft verwendet solche Modelle dann, um Dienste für seinen Kundenstamm bereitzustellen. Da sich die Modelle nur über einen bestimmten Zeitraum verbessern, wenn mehr Informationen gesammelt werden, verfügt JaphSoft nicht über einen Löschvorgang für die von Clients empfangenen Daten. Um jedoch die Einhaltung der Datenschutzbestimmungen zu gewährleisten, pseudonymisiert JaphSoft die personenbezogenen Daten, indem identifizierende Informationen aus den Kontaktinformationen entfernt werden. Die Ingenieure von JaphSoft verwalten jedoch alle Kontaktinformationen in derselben Datenbank wie die identifizierenden Informationen.

Im Rahmen der Vereinbarung mit Liem und EcoMick erhielt JaphSoft Zugriff auf MarketIQ, das Kontaktinformationen sowie die vorherige Kaufhistorie für solche Kontakte enthielt, um Kampagnen zu erstellen, die zu den meisten Ansichten der Websites der beiden Unternehmen führen würden. Eine frühere Liem-Kundin, Frau Iman, erhielt von JaphSoft eine Marketingkampagne zu den neuesten Produkten von Liem und EcoMick. Während Frau Iman sich daran erinnert, ein Kästchen angekreuzt zu haben, um künftig Informationen zu Liems Produkten zu erhalten, hat sie weder EcoMick eingekauft noch ihre persönlichen Daten an dieses Unternehmen weitergegeben. Warum sollte die von Frau Iman erteilte Zustimmung in Bezug auf JaphSoft NICHT als gültig angesehen werden?

- A. Sie hat nur die visuellen Darstellungen der Datenschutzerklärung angesehen, die Liem zur Verfügung gestellt hat.
- B. Ihr wurde nicht mitgeteilt, welcher Controller ihre persönlichen Daten verarbeiten würde.
- C. Sie hat den Datenschutzhinweis nicht gelesen, der besagt, dass ihre persönlichen Daten weitergegeben werden.
- D. Sie hat noch nie bei JaphSoft eingekauft und hat keine Beziehung zum Unternehmen.

Answer: C
