Answer: C

NEW QUESTION: 3

You are planning an Azure solution that will host production databases for a high-performance application.

The solution will include the following components:

- * Two virtual machines that will run Microsoft SQL Server 2016, will be deployed to different data centers in the same Azure region, and will be part of an Always On availability group.
- * SQL Server data that will be backed up by using the Automated Backup feature of the SQL Server IaaS
- * Agent Extension (SQLIaaSExtension)

You identify the storage priorities for various data types as shown in the following table.

Which storage type should you recommend for each data type? To answer, drag the appropriate storage types to the correct data types. Each storage type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.
