NEW QUESTION: 1

A group of administrators have their own login IDs for Web Client. One of the login IDs is not being displayed in the drop down box. Where would you look to see if the login ID was removed?

- A.** on the report server In the administration logs under Administration > AdministrationHistory/Maintenance Log
- B.** In the Administration logs under event viewer
- C.** on the Message Storage Server (MSS) in the administration logs under Administration > Administration History/Maintenance Log
- D.** on the Web Client in the administration logs under Administration > Administration History/Maintenance Log

Answer: C

NEW QUESTION: 2

Which of the following is an object-oriented technology characteristic that permits an enhanced degree of security over data?

- A.** Dynamic warehousing

- B. Polymorphism
- C. inheritance
- D. Encapsulation

Answer: D

Explanation:

Encapsulation is a property of objects, and it prevents accessing either properties or methods that have not been previously defined as public. This means that any implementation of the behavior of an object is not accessible. An object defines a communication interface with the exterior and only that which belongs to that interface can be accessed.

NEW QUESTION: 3

When working with a globally distributed team, the most useful approach would be to:

- A. Bring the entire team together for a diversity and sensitivity training day before starting the first iteration.
- B. Bring the entire group together for a get-to-know-you session before starting the first iteration.
- C. Gather the entire team for a kickoff event and keep them working together for at least the first iteration.
- D. Bring the entire group together for a big celebration at the end of the project

Answer: C
