NEW QUESTION: 2

Universal Containers (UC) uses a custom lightning component with an Apex class to display shipment information (custom object, private OWD). UC sales managers are complaining about two important points:

- * Shipment records that belong to their teams can be seen by other users.
- * Shipment amount should be visible only by managers, but sales reps are able to view it. Which two features did the development team miss that is causing the problems?

Choose 2 answers.

- A.** Use isSharable keyword in Apex classes to assure record visibility.
- B.** Use With Sharing keyword in Apex classes to enforce sharing rules evaluation.
- C.** Use isAccessible() method in Apex classes to check field accessibility How can an architect achieve this

https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_per ms_enforcing.htm Example: To check the field-level read permission of the contact's email field before querying for this field:

```
if (Schema.sObjectType.Contact.fields.Email.isAccessible()) {
Contact c = [SELECT Email FROM Contact WHERE Id= :Id];
}
```

Answer for B -

https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_key words_sharing.htm The "with sharing" keyword allows you to specify that the sharing rules for the current user are considered for the class. You have to

explicitly set this keyword for the class because Apex code runs in system context. In system context, Apex code has access to all objects and fields- object permissions, field-level security, sharing rules aren't applied for the current user. This strategy ensures that code doesn't fail to run because of hidden fields or objects for a user.

D. Use runAs in test class to enforce user permissions and field-level permissions.

Answer: B,C

NEW QUESTION: 3

Which of the following is a valid Apex class? (Choose two.)

- A. `public class MyClass { }`
- B. `public class MyClass { }`
- C. `public class MyClass { }`
- D. `public class MyClass { }`

Answer: D

NEW QUESTION: 4

You are designing a Windows 8 application.

You need to identify user flows and features and create a Great At statement.

In what order should you complete the design activities?

- A. create a Great At statement, identify user flows, identify features
- B. identify user flows, identify features, create a Great At statement
- C. identify user flows, create a Great At statement, identify features
- D. create a Great At statement, identify features, identify user flows

Answer: A
