So why don't you choose our C-S4CAM-2102 exam cram as a comfortable passing plan directly, For whatever reason you scan this site, I think you must have a strong desire to pass the C-S4CAM-2102 test and get the related certification.

Why Choose Mecatronica C-S4CAM-2102 Exam Dumps, The fact is that they never insist on one thing and give up quickly, Some people are too busy to prepare for the C-S4CAM-2102 exam test due to the realistic reasons.

You can seek our help on our C-S4CAM-2102 practice questions anytime, anywhere.

#### **NEW QUESTION: 1**

Which of the following is an example of a process? (MRP)   
 A. A process that is used to create a product.   
 B. A process that is used to create a service.   
 C. A process that is used to create a system.   
 D. A process that is used to create a network.

- A. A process that is used to create a product.
- B. A process that is used to create a service.
- C. A process that is used to create a system.
- D. A process that is used to create a network.

**Answer: A**

#### **NEW QUESTION: 2**

After a system was hacked by an outsider, a technician is dispatched to the system. The technician records the location of the system on a log and then signs the system over to a tier-two technician. The tier-two technician analyzes the system and then signs it over to the case manager. Which of the following is this an example of?

- A. Due process

- B. Evidence preservation
- C. Chain of custody
- D. Process documentation

**Answer: C**

Explanation:

Reference: [http://en.wikipedia.org/wiki/Chain\\_of\\_custody](http://en.wikipedia.org/wiki/Chain_of_custody)

**NEW QUESTION: 3**

You design an Azure application that processes images. The maximum size of an image is 10 MB. The application includes a web role that allows users to upload images and a worker role with multiple instances that processes the images. The web role communicates with the worker role by using an Azure Queue service.

You need to recommend an approach for storing images that minimizes storage transactions.

What should you recommend?

- A. Store images in OneDrive attached to the worker role instances. Store references to the images in the queue.
- B. Store images in Azure Blob service. Store references to the images in the queue.
- C. Store images in local storage on the web role instance. Store references to the images in the queue.
- D. Store images in the queue.

**Answer: B**

Explanation:

Azure Queues provide a uniform and consistent programming model across queues, tables, and BLOBs - both for developers and for operations teams.

Microsoft Azure blob storage can be used to store the image data, the application can use a worker role in Azure to perform background processing tasks on the images, how the application may use shared access signatures to control access to the images by users.

Azure blobs provide a series of containers aimed at storing text or binary data. Block blob containers are ideal for streaming data, while page blob containers can be used for random read/write operations.

**NEW QUESTION: 4**

Which of the following types of attack often take advantage of curiosity or greed to deliver malware?

- A. Pretexting
- B. Soft coding

- C. Tripwire
- D. None of the choices.
- E. Icing
- F. Gimmes

**Answer: F**

Explanation:

Explanation/Reference:

Explanation:

Gimmes take advantage of curiosity or greed to deliver malware. Also known as a Trojan Horse, gimmes can arrive as an email attachment promising anything. The recipient is expected to give in to the need to the program and open the attachment. In addition, many users will blindly click on any attachments they receive that seem even mildly legitimate.
