You may wonder how I can ensure you pass C-SAC-2114 real test quickly, You will always find Mecatronica's dumps questions as the best alternative of your money and time.

First of all, the fields will be sent to your e-mail box at once you purchase C-SAC-2114 study prep material which guarantee more time for your exam, Our real passing rate is high to 99.36% for C-SAC-2114 tests.

There is no doubt that it is of great significance **C-SAC-2114 Pdf Exam Dump** for all of the workers in the field to fully release their potential in an exam since there are so many hard nuts in the exam which you have to crack, but now our company is here in order to present the fast track for you"our C-SAC-2114 exam dumps.

It has a few C-SAC-2114 questions solved.

NEW QUESTION: 1

You are preparing Control Plane Protection configurations for implementation on the router, which has the EBGP peering address 1.1.1.2. Which ACL statement can you use to classify the related traffic into the EBGP traffic compartment?

- A. permit tcp host 1.1.1.1 gt 1024 host 1.1.1.2 eq bgp permit tcp host 1.1.1.1 eq bgp host 1.1.1.2 gt 1024
- B. permit tcp host 1.1.1.2 gt 1024 host 1.1.1.2 eq bgp permit tcp host 1.1.1.2 eq bgp host 1.1.1.2 gt 1024
- C. permit tcp host 10.1.1.1 gt 1024 host 10.1.1.2 eq bgp permit tcp host 10.1.1.1 eq bgp host 10.1.1.2 gt 1024
- D. permit tcp host 1.1.1.1 gt 1024 host 1.1.1.1 eq bgp permit tcp host 1.1.1.1 eq bgp host 1.1.1.1 gt 1024

Answer: A

NEW QUESTION: 2

You are developing a SQL Server Analysis Services (SSAS) tabular project.

A column named City must be added to the table named Customer. The column will be used in the definition of a hierarchy. The City column exists in the Geography table that is related to the Customer table.

You need to add the City column to the Customer table. How should you write the calculation?

- A. City:=VALUES(Geography[City])
- B. City:=LOOKUPVALUE(Geography[City],Geography[GeographyKey],[GeographyKey]) C .=RELATED(Geography[City])
- C. =RELATED(Geography.City)
- D. City:=LOOKUP(Geography[City],Geography[GeographyKey],[GeographyKey])
- E. =VALUES(Geography[City])

Answer: C

Explanation:

* RELATED Function

Returns a related value from another table.

NEW QUESTION: 3

In Mandatory Access Control, sensitivity labels attached to objects contain what information?

- A. The item's classification
- B. The item's category
- C. The items' need to know
- D. The item's classification and category set

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Mandatory Access Control begins with security labels assigned to all resource objects on the system.

These security labels contain two pieces of information - a classification (top secret, confidential etc.) and a category (which is essentially an indication of the management level, department or project to which the object is available).

Similarly, each user account on the system also has classification and category properties from the same set of properties applied to the resource objects. When a user attempts to access a resource under Mandatory Access Control the operating system checks the user's classification and categories and compares them to the properties of the object's security label. If the user's credentials match the MAC security label properties of the object access is allowed. It is important to note that both the classification and categories must match. A user with top secret classification, for example, cannot access a resource if they are not also a member of one of the required categories for that object.

Incorrect Answers:

A: In Mandatory Access Control, the sensitivity labels attached to objects contain a category set as well as the item's classification.

C: In Mandatory Access Control, the sensitivity labels attached to objects contain the item's classification as well as a category.

D: An item's need to know is not something that is included in the sensitivity label. The categories portion of the label is used to enforce need-to-know rules.
