Secure website ordering - via - Mcfee secure C-THR87-2105, We have three kinds of C-THR87-2105 practice materials moderately priced for your reference.

**NEW QUESTION: 1**

You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox.

Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application.

You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their respective application.

What should you do?

- A. Convert the service account mailboxes into shared mailboxes.
- B. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.
- C. Convert the service account mailboxes into mail-enabled users.
- D. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.

**Answer: A**
