Customers who want to buy more than **C1000-124 Latest Braindumps Sheet** 3 exams at discounted price can request for "Custom Bundle".

NEW QUESTION: 1

- A. Options snapmirror.resync on
- B. Snap mirror resync
- C. Options snapmirror.access on
- D. Snapmirror initialize

Answer: B,D

Explanation:

https://library.netapp.com/ecmdocs/ECMP1196979/html/man1/na_snapmirror.1.html snapmirror initialize [-S source] [-k kilobytes] [-s src_snap] [-c create_dest_snap] [-w] destinationStarts an initial transfer over the network. An initial transfer is required before update transfers can take place.

The initialize command must be issued on the destination node. If the destination is a volume, it must berestricted (see

na_vol(1) for information on how to examine and restrict volumes). If the destination is a qtree, it must not already exist (see na_qtree(1) for information on how to list qtrees). If a qtree already exists, it must be renamed or removed (using an NFS or CIFS client), or snapmirror initialize to that qtree will not work.

```
snapmirror resync [ -n ] [ -f ] [ -S source ] [ -k kilobytes ] [ -s src_snap ]
```

[-c create_dest_snap] [-w] destinationResynchronizes a broken-off destination to its former source, putting the destination in the snapmirrored state and making it ready for update transfers.

The resync command must be issued on the destination node.

NEW QUESTION: 2

Which statement is true about an image deployed by NetInstallService that has an index value between 1 and 4095?

- A. It's a NetBoot image.
- B. It's intended to be hosted on only one NetInstallServer.
- C. It's a NetRestore image.
- D. It's a NetInstallImage.

Answer: B
