NEW QUESTION: 2
Refer to the exhibit.

A network administrator attempts to ping Host2 from Host1 and receives the results that are shown. What is the problem?
A. The link between Host1 and Switch1 is down.
B. The default gateway on Host1 is incorrect.
C. The link between Switch1 and Router1 is down.
D. TCP/IP is not functioning on Host1
E. Interface Fa0/0 on Router1 is shutdown.
F. The link between Router1 and Router2 is down.
Answer: F
Explanation:
Host1 tries to communicate with Host2. The message destination host unreachable from Router1 indicates that the problem occurs when the data is forwarded from Host1 to Host2. According to the topology, we can infer that the link between Router1 and Router2 is down.

NEW QUESTION: 3
During a review of a business continuity plan, an IS auditor noticed that the point at which a situation is declared to be a crisis has not been defined. The MAJOR risk associated with this is that:
A. notification of the teams might not occur.
B. potential crisis recognition might be ineffective.
C. assessment of the situation may be delayed.
D. execution of the disaster recovery plan could be impacted.
Answer: D
Explanation:
Explanation/Reference:
Explanation: Execution of the business continuity plan would be impacted if the organization does not know when to declare a crisis. Choices A, C and D are steps that must be performed to know whether to declare a crisis. Problem and severity assessment would provide information necessary in declaring a disaster. Once a potential crisis is recognized, the teams responsible for crisis management need to be notified. Delaying this step until a disaster has been declared would negate the effect of having response teams. Potential crisis recognition is the first step in responding to a disaster.
