NEW QUESTION: 1

What is a purpose of the network analysis policy on a Cisco Firepower NGIPS?

- A. it specifies the outer-header criteria used to process traffic without using advanced inspection
- B. it governs how traffic is preprocessed before inspection
- C. it examines packets for attacks by using intrusion rules

D. it defines the rules for encrypting traffic

Answer: B

Explanation:

Explanation

Explanation/Reference

Network analysis policies govern many traffic preprocessing options, and are invoked by advanced settings in your access control policy. Network analysis-related preprocessing occurs after Security Intelligence blacklisting and SSL decryption, but before intrusion or file inspection begins.

show ip protocols vrf

A. BGP 800 OSPF 1

B. OSPF 1 BGP 800

C. BGP 800 OSPF 1

D. OSPF 1 BGP 800

Answer: C

NEW QUESTION: 4

Given the code fragment:

What change should you make to apply good coding practices to this fragment?

- A. Rethrow SQLException.
- B. Add the statement and ResultSet declarations to the try-with-resources statement.
- C. Add nested try-with-resources statements for the statement and ResultSet declarations.
- D. Add a finally clause after the catch clause.

Answer: D

Explanation:

The finally block always executes when the try block exits. This ensures that the finally block is executed even if an unexpected exception occurs. But finally is useful for more than just exception handling - it allows the programmer to avoid having cleanup code accidentally bypassed by a return, continue, or break. Putting cleanup code in a finally block is always a good practice, even when no exceptions are anticipated.
