NEW QUESTION: 1

A newborn was admitted to the neonatal intensive care unit. His diagnosis is febrile seizures. In preparing

for his admission, which of the following is the most important nursing action?

- A. Pad the side rails of his bed
- B. Place a cooling mattress on his bed
- C. Request an order of a stat admission CBC
- D. Place a urine collection bag and specimen cup at the bedside

Answer: A

Explanation:

In preparing for his admission, the most important nursing action is to pad the side rails of his bed. The patient has a diagnosis of febrile seizures. Precautions to prevent injury and promote safety should take precedence.

NEW QUESTION: 2

Which authentication method does OSPFv3 use to secure communication between neighbors?

- A. PKI
- B. MD5 HMAC
- C. plaintext
- D. IPsec

Answer: D

Explanation:

In order to ensure that OSPFv3 packets are not altered and re-sent to the device, causing the device to behave in a way not desired by its system administrators, OSPFv3 packets must be authenticated. OSPFv3 uses the IPsec secure socket API to add authentication to OSPFv3 packets. This API supports IPv6. OSPFv3 requires the use of IPsec to enable authentication. Crypto images are required to use authentication, because only crypto images include the IPsec API needed for use with OSPFv3.

Reference:

http://www.cisco.com/c/en/us/td/docs/ios-xml/ios/iproute_ospf/configuration/15-sy/irol15-sy-book/ip6-route-ospfv3-auth-ipsec.html

NEW QUESTION: 3

An administrator wants to configure authentication on the HP 830 switch ports that connect to wireless access points. The company policy requires all wireless users to be authenticated using 802.1X authentication. Each port should also allow multiple wireless users to pass 802.1X authentication.

Which port security mode meets these requirements?

- A. macAddressElseUserLoginSecureExt
- B. userLoginSecure
- C. userLoginSecureExt
- D. macAddressWithRadius

Answer: A
