For example, you can spend much time and energy on the preparation for CHISP CHISP exam, also you can choose an effective training course, Our online resources [CHISP](#) and events enable you to focus on learning just what you want on your timeframe.

NEW QUESTION: 1

A user is creating a PIOPS volume. What is the maximum ratio the user should configure between PIOPS and the volume size?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Provisioned IOPS volumes are designed to meet the needs of I/O-intensive workloads, particularly database workloads that are sensitive to storage performance and consistency in random access I/O

throughput. A provisioned IOPS volume can range in size from 10 GB to 1 TB and the user can provision up to 4000 IOPS per volume.

The ratio of IOPS provisioned to the volume size requested can be a maximum of 30; for example, a volume with 3000 IOPS must be at least 100 GB.
