#### **NEW QUESTION: 1**

Which Security Onion tool should the security analyst use to as the centralized syslog collector?

- A. SNORT
- B. OSSEC
- C. ELSA
- D. Bro

**Answer: C**

#### **NEW QUESTION: 2**

HOTSPOT

**Answer:**

Explanation:

#### **NEW QUESTION: 3**

A customer's network consists of a data center with an Interceptor appliance and a Steelhead appliance cluster and several remote sites each with Steelhead appliances. You would like to pass-through an application unoptimized due

to a suspected problem and are provided the following information:

The application uses a static TCP port, 15000.

The application is initiated from the remote site machines.

The same servers which host the application host several other applications as well.

Based on the information provided which option will allow the application to pass-through:

- A. Configure in-path rules on the Interceptor appliance to pass-through destination TCP port
- B. Stop the Interceptor appliance service
- C. Configure a peering rule on the Interceptor appliance to pass-through destination TCP port
- D. Configure a load-balancing rule on the Interceptor appliance to pass-through destination TCP port 15000
- E. Configure in-path rules on the data center Steelhead appliances to pass-through the server IP addresses

**Answer: D**
