Answer: B

NEW QUESTION: 2

Which of the following price strategies would one use if they seek to recover variable cost while enticing a buyer with a price that covers neither the fixed cost nor profit?

- A. Market based approach
- B. Loss leader pricing
- C. Time and material contracts
- D. Market demand pricing

Answer: B

Explanation:

One would use loss leader pricing if they seek to recover variable cost while enticing a buyer with a price that covers neither the fixed cost nor profit. In market demand pricing the seller determines demand and prices at a level that meets customer expectations and provides an acceptable profit. Time and material contracts allow the seller to charge an hourly rate for labor plus the cost of materials and allowable expenses. Market based approach is actually a product price structure.

- A. Packet sniffer
- B. nslookup
- C. Spectrum analyzer
- D. netstat

Answer: A

NEW QUESTION: 4

An organization has added 3 of his AWS accounts to consolidated billing. One of the AWS accounts has purchased a Reserved Instance (RI) of a small instance size in the US-East-1a zone. All other AWS accounts are running instances of a small size in the same zone. What will happen in this case for the RI pricing?

- A. Only the account that has purchased the RI will get the advantage of RI pricing
- B. Any single instance from all the three accounts can get the benefit of AWS RI pricing if they are running in the same zone and are of the same size
- C. One instance of a small size and running in the US-East-1a zone of each AWS account will get the benefit of RI pricing
- D. If there are more than one instances of a small size running across multiple accounts in the same zone

no one will get the benefit of RI

Answer: B

Explanation:

AWS consolidated billing enables the organization to consolidate payments for multiple Amazon Web Services (AWS) accounts within a single organization by making a single paying account. For billing purposes, consolidated billing treats all the accounts on the consolidated bill as one account. This means that all accounts on a consolidated bill can receive the hourly cost benefit of the Amazon EC2 Reserved Instances purchased by any other account. In this case only one Reserved Instance has been purchased by one account. Thus, only a single instance from any of the accounts will get the advantage of RI. AWS will implement the blended rate for each instance if more than one instance is running concurrently.
