Writing Test

The passages below contain several enumerated sections, each of which may or may not contain an error of grammar, usage or style. For each multiple-choice question, the first choice reproduces the selection from the original passage. The other choices offer alternatives. Select the best choice from among the five choices offered for each enumerated selection.

(21)Teachers have long been known that teenage students do not really wake up (22) until well passed the time they physically arrive at school. (23)There's a well-known reason for this: researchers have found that (24)the teenage students blood contains (25)large amounts of the sleep hormone, melatonin. Scientists at a major university (26)are making a way of advancing the melatonin cycle (27)to help with this problem. (28)Melatonin production follows a daily cycle: it rises at night (29) and disappears at the daylight hours.

(30)It is well-known that exposing the eyes to light during the evening (31) delays melatonin's flowings start until (32) after the person went into the darkness of the bedroom. (33)Because of the students liking to stay up late (34) working on their computers or watching television, their melatonin cycle is delayed. (35)So when that happens in the morning, (36)the cycle don't end until well after they are in school.

(37)However, as it happens, it turns out that not all light causes suppression of melatonin. (38) Only blue light. This means (39)that if you wear glasses that block blue light is the same as being in darkness as far as melatonin production is concerned. (40)Putting on blue blocking glasses at 9:00 P.M. will move the daily cycle forward in time so that the melatonin flow is over before the student gets to school.
