NEW QUESTION: 1

A customer is implementing an IBM Storwize V7000 Unified solution and will access both file and block storage. Two fibre

channel adapters are included within each controller.
What is the maximum number of fibre channel connections the customer can connect to its SAN fabrics?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Explanation/Reference:

With the introduction of the 2076-524 nodes, and the ability to have up to eight FC ports per node, there are several different options that are valid for attaching storage to the Storwize V7000 Gen2 cluster.

Apply these Storwize V7000 Unified configuration details for Fibre Channel and Fibre Channel Over Ethernet (FC/FCoE Gateway, FCF) switches to ensure that you have a valid configuration. Configuring your SAN with at least two independent switches, or networks of switches, ensures a redundant fabric with no single point of failure. If one of the two SAN fabrics fails, the configuration is in a degraded mode, but is still valid. You should maintain separate fabrics for FCoE and FC. If you attempt to combine these fabrics, you might risk adding additional paths to the volumes. Supported configurations allow a maximum of eight paths.

NEW QUESTION: 2

HOTSPOT

You are managing a SharePoint document library app named App1. You need to stop inheritance for App1.

On which page should you modify this setting? (To answer, select the appropriate page link in the answer area.) Hot Area:

Answer:

Explanation:

Explanation/Reference:

Note:

See step 3 and 4 below.

If you stop inheritance and create unique permissions for the list or library, you can then add users or SharePoint groups directly to the list or library.

Open the list or library to which you want to add users or SharePoint groups.

On the Settings menu, click Document Library Settings or List Settings.

On the Customize page, in the Permissions and Management column, click Permissions for this

document library or Permissions for this list.

If your list or library is inheriting permissions, you must first stop inheriting permissions. To do this, on

theActions menu, click Edit Permissions, and then click OK to confirm that you want to create unique permissions.

On the New menu, click Add Users.

In the Add Users section, specify the users and SharePoint groups that you want to add to this list or

library.

In the Give Permission section, either add the users to an existing SharePoint group or give them

permission directly to the list or library and then select one or more of the check boxes to give these users the permissions that you want.
