### **NEW QUESTION: 1**

The following requirements are for a new call centre customer management system:

REQ#1: Must allow the operator to leave work at 5pm.

REQ#2: Must allow users to operate the system anywhere in the world.

REQ#3: Should allow the customer to log a call.

REQ#4: Should be implemented in the English language.

REQ#5: Must allow the operator to amend and delete a call record.

Requirements analysis checks for the following:

(a) Potentially infeasible requirements.

(b) Requirements that pre-define a solution.

(c) Requirements which are actually multiple requirements.  
(d) Requirements that conflict.  
(e) Requirements that do not relate to the business objective.  
Which of these issues can be identified in this requirements set?

- A. c, d and e only.
- B. b, c and e only.
- C. a, c and e only.
- D. a, b and c only.

**Answer: C**

### **NEW QUESTION: 2**

View the Exhibit.

You have defined a compare validation rule on the CommissionPct attribute of the Employees entity object such that Commission must be greater than zero. How would you define that the validation rule applies only to those with the JobId "SA\_MAN" using the declarative features of ADF Business Components? (Choose the best answer.)

- A. Change the literal value in the current validation rule to be if JobId = SA\_MAN then return 0.1 else return null.
- B. Remove the current validator and, instead, write a method validator in Java and use an if statement to check the value of JobID.
- C. Remove the current validator and, instead, write a script validator using Groovy and use an if statement to check the value of JobID.
- D. The entity object has a Validation Execution tab and you use this to set a conditional execution expression JobId= "SA\_MAN".
- E. Remove the current validator and, instead, write a regular expression validator to check the value of JobID.

**Answer: C**

Explanation:

Explanation/Reference:

You can use eGroovy Expressions for Business Rules and Triggers.
