So with the help of our C_S4CMA_2105 updated questions, there will be no hard nut for you to crack.

NEW QUESTION: 1

An administrator is configuring an identity source for Single Sign-On. The administrator will use the machine that Single Sign-On is running on, but does not want all users on the machine to be visible to SSO.

Which Identity Source meets this requirement?

- A. Active Directory (Integrated Windows Authentication)
- B. Active Directory as an LDAP Service
- C. OpenLDAP
- D. LocalOS

Answer: A

NEW QUESTION: 2

Scenario: A company is implementing a new security solution. The solution will use a central security server to manage all security policies. The security server will be connected to all client machines. The security server will be responsible for enforcing all security policies. The security server will also be responsible for logging all security events. The security server will be responsible for generating reports on security events.

- A. The security server will be responsible for enforcing all security policies.
- B. The security server will be responsible for logging all security events.
- C. The security server will be responsible for generating reports on security events.
- D. The security server will be responsible for managing all security policies.

Scenario: A company is implementing a new security solution. The solution will use a central security server to manage all security policies. The security server will be connected to all client machines. The security server will be responsible for enforcing all security policies. The security server will also be responsible for logging all security events. The security server will be responsible for generating reports on security events.

- A. The security server will be responsible for enforcing all security policies.
- B. The security server will be responsible for logging all security events.
- C. The security server will be responsible for generating reports on security events.
- D. The security server will be responsible for managing all security policies.

Answer: B

NEW QUESTION: 3

You work as a Project Manager for company.com Inc. You have been assigned a task to configure the Project Portfolio Server. Assuming that the Project Server is in the same domain, which of the following conditions will you use to connect the Project Server and the Portfolio Server Gateway?

- A. The Project Portfolio Server and the Microsoft Project Server 2010 must join the same farm.
- B. The administrator account must be added to the Project Portfolio Admins group.
- C. The Shared Services Provider needs to give rights to the Portfolio Server.
- D. The Project Portfolio Server must be trusted by the current domain.

Answer: C

Explanation:

You must configure the Shared Services Provider to give rights to the Portfolio Server. This can be done from the SharePoint Central Administration site. Answer option D is incorrect. You need not create a farm, as Project Portfolio Server can run on the same computer as Microsoft Project Server. Answer option A is incorrect. There is no trust needed if the server is in the current domain. Answer option C is incorrect. This is a service-related issue, not a user account issue.
