And we offer you free demo for you to have a try before buying C\_S4CSC\_2105 exam materials, so that you can have a better understanding of what you are going to buy.

100% correct answers provided by SAP experts, Learning requires a lot of motivation and self-discipline, There's no better way to effectively prepare other than using actual SAP C\_S4CSC\_2105 SAP Certified Application Associate questions provided by us.

It seems as if their cognition has enhanced C\_S4CSC\_2105 Exam Vce to a great degree overnight, Sometimes it is more stable than Soft version.

**NEW QUESTION: 1**

- A. Option B
- B. Option A
- C. Option D
- D. Option C

**Answer: B**

Explanation:

Explanation

First we should check Branch3 (and R1) with the "show ip interface brief" command to find any Layer1/Layer 2 issue.

We see the interfaces connecting between them are in "up/down" states which indicates an Layer 2 issue so we should check the configuration of these interfaces carefully with the "show running-config" command and pay attention to these interfaces.

and on Branch3:

We learn from above config is R1 is using CHAP to authenticate Branch3 router (via the "ppp authentication chap" command on R1). Branch3 router is sending CHAP hostname "Branch\_3" and CHAP password

"Branch3\_Secret!" to R1 to be authenticated. Therefore we should check if R1 has already been configured with such username and password or not with the "show running-config" command on R1:

R1\_show\_run\_username.jpg

On R1 we see the configured username is "Branch3", not "Branch\_3" so the usernames here are mismatched and this is the problem -&gt; Answer A is correct.

**Answer:**

Explanation:

Explanation:

Box 1:

To onboard down-level Windows client endpoints to Microsoft Defender ATP, you'll need to:

Configure and update System Center Endpoint Protection clients. Install and configure Microsoft Monitoring Agent (MMA) to report sensor data to Microsoft Defender ATP

Box 2:  
For Windows 10 clients, the following deployment tools and methods are supported:

Group Policy

System Center Configuration Manager

Mobile Device Management (including Microsoft Intune)

Local script

Box 3:

Windows Server 2016 can be onboarded by using Azure Security Centre. When you add servers in the Security Centre, the Microsoft Monitoring Agent is installed on the servers.
