NEW QUESTION: 1

According to a manager it takes an average weekday commute of 39 minutes with a Standard Deviation of 7 minutes for the employees to get to work while they use their personal vehicles for their office commute while the management set a policy of

not more than 40 minutes for their daily one-way commute. A survey conducted one day on 70 employees showed an average of 34 minutes commuting time using the metro public transportation system with a Standard Deviation of 21 minutes. If the Standard Deviation is uncontrollable then the other option to increase the probability of coming in on time via personal vehicles to work could be _____?

- A. Change policy at work and request for flexible times based on location
- B. Reduce average commute time to work by departing earlier
- C. Increase the average time of commute
- D. Maintain the average time of commute and change route to work

Answer: B

NEW QUESTION: 2

You want to reset SIC between smberlin and sgosaka.

In SmartDashboard, you choose sgosaka, Communication, Reset. On sgosaka, you start cpconfig, choose Secure Internal Communication and enter the new SIC Activation Key. The screen reads The SIC was successfully initialized and jumps back to the cpconfig menu. When trying to establish a connection, instead of a working connection, you receive this error message: What is the reason for this behavior?

- A. The Check Point services on the Gateway were not restarted because you are still in the cpconfig utility.
- B. The Gateway was not rebooted, which is necessary to change the SIC key.
- C. You must first initialize the Gateway object in SmartDashboard (i.e., right-click on the object, choose Basic Setup > Initialize).
- D. The activation key contains letters that are on different keys on localized keyboards. Therefore, the activation can not be typed in a matching fashion.

Answer: A

NEW QUESTION: 3

The total of all data values divided by the number of data points.

- A. Standard deviation
- B. Median
- C. Mode
- D. Mean

Answer: D
